

RECLAIM YOUR EMAIL

Barracuda Spam Firewall

The Barracuda Spam Firewall delivers powerful, easy to use, and affordable enterprise-class spam and virus protection.

Email has undoubtedly become a key tool for communications among companies worldwide. However, with frequent virus attacks and the alarming rate that spam has been filling up inboxes, email is quickly becoming a less efficient means of communicating. In fact, the Radicati Group, a market research firm in Palo Alto, California, predicts that by 2007, there will be 50 billion spam messages each day, costing companies almost \$200 billion per year. This is simply astounding and unacceptable. It's time to take control of spam.

The Barracuda Spam Firewall is an integrated hardware and software solution that has the power of an enterprise-class solution, and the ease-of-use and affordability that businesses of all sizes demand.

Powerful, Enterprise-Class Solution

Designed by a team of veteran networking engineers, the Barracuda Spam Firewall is a powerful, enterprise-class solution, supporting 25,000 active email users and handling 25 million messages each day. Its architecture leverages open source virus and spam solutions in conjunction with ten defence layers:

- > denial of service and security protection
- > IP block list
- > rate control
- > virus check with archive decompression
- > Barracuda virus check
- > user-specified rules
- > spam fingerprint check
- > intention analysis
- > Bayesian analysis
- > rule-based scoring

This architecture optimizes the processing of each email, which yields the performance required to process millions of messages per day. Unlike software solutions, the Barracuda Spam Firewall reduces the load placed on the email server by off-loading both spam and virus filtering.

Easy to Use and Maintain

With no software to install and no modifications required to existing email systems, installation is extremely easy, typically taking only five minutes. Once installed, the system administrator uses an intuitive web interface for monitoring and maintenance. The Barracuda Spam Firewall requires minimal maintenance because its innovative design incorporates reliability into every aspect of the product. Energize updates are automatically retrieved by the Barracuda Spam Firewall, enabling maximum spam and virus protection while eliminating administrative overhead. These updates are provided by Barracuda Central, an advanced technology operations centre where engineers continuously monitor the Internet for trends in spam and virus attacks.

Affordable

The Barracuda Spam Firewall is affordable for businesses of all sizes—anywhere from small to large. It has no per user licence fee, making it the most affordable enterprise-class spam and virus protection solution available.

At Barracuda Networks, we ensure that our customers are 100% satisfied. Our responsive Barracuda Technical Support Team provides customers with comprehensive telephone support.

We invite you to call us or your local distributor today to learn more about how the Barracuda Spam Firewall can deliver powerful, easy to use, and affordable enterprise-class spam and virus protection to your organisation.

Barracuda Spam Firewall Defence Layers

TECHNICAL SPECIFICATIONS

Key Features

SPAM FILTER

- Bayesian Algorithms
- Content-based Filtering
- Denial of Service Protection
- Keyword Blocking
- Multilingual
- Rate Control
- RBL and DNSRBL Support
- Rule-based Scoring Algorithms
- SPF & Sender ID
- Spam Fingerprint Checking

VIRUS FILTER

- Dual Layer Virus Blocking
- Decompression of Archives
- File Type Blocking

ADMINISTRATION

- Email Tagging, Quarantine, and Blocking
- Multilingual User Interface
- Multiple Domain Support
- Reports, Graphs, and Statistics
- Whitelists and Blacklists

Connectors

- Serial Port (DB-9)
- VGA
- PS/2 Keyboard
- Ethernet (see chart below)

Front Panel Indicators

- Activity Indicator
- Email Blocked Indicator
- Email Quarantined Indicator
- Email Received Indicator
- Power Indicator
- Power Button
- Reset Button

System Administration

- Web-based Interface
- Statistical Reporting Tools
- User Account Administration

Power Requirements

- AC Input Voltage 100-240 Volts
- Frequency 50/60 Hz

Support Options

STANDARD SUPPORT

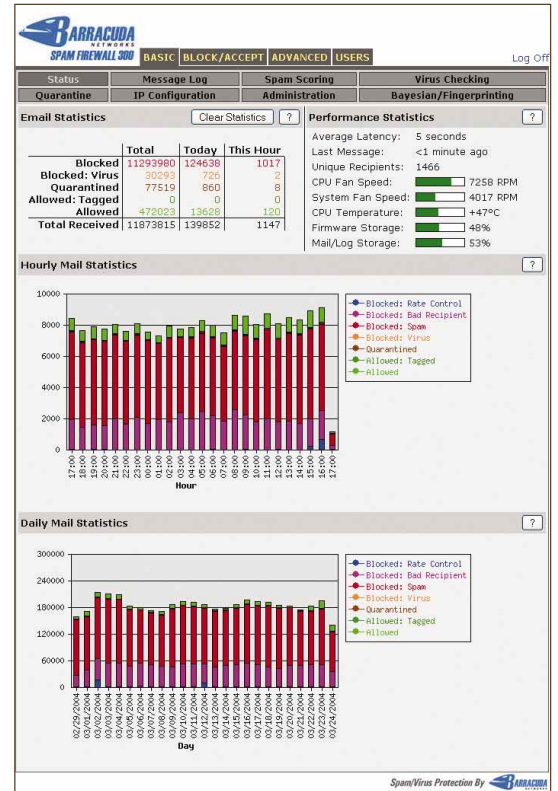

- Complimentary Telephone Support

ENERGIZE UPDATES SUBSCRIPTION

- Hourly update of spam rules
- Hourly update of virus definitions
- Real time update of spam fingerprints
- Real time update of blacklists

INSTANT REPLACEMENT SERVICE

- Replacement unit shipped next business day
